

C++ Loops | Set 1 (Print a string N times)

Given an integer N. The task is to print "GeeksforGeeks" N times (without quotes). Every time "GeeksforGeeks" will be printed on a new line.

Input:

The first line contains a single integer T i.e. the number of test cases. Each test case contains a single integer N representing number of times the string "GeeksforGeeks" will be printed.

Output:

Corresponding to each test case, print "GeeksforGeeks" N times (without quotes), every time on a new line.

Constraints:

$1 \leq T \leq 20$

$1 \leq N \leq 100$

Example:

Input:

2
3
2

Output:

GeeksforGeeks
GeeksforGeeks
GeeksforGeeks
GeeksforGeeks
GeeksforGeeks
